SUMMARY

I am a dedicated student, always striving and enjoying learning. As a professional, I have some years of experience working on different software projects. My goal was to acquire the necessary foundations to fully perform in the IT area. Having studied software engineering, networking and with my professional experience, I am ready to start forging my career in this competitive, yet rewarding world.

I am bilingual in Spanish and English, and intermediate-advanced in French. My commitment is to complete my work in the most efficient and creative way, regardless of its size. Discipline, open-mindedness and balance are my values.
